DETAILED ACTION

Allowable Subject Matter

1. **Claims 1 – 9, 11 and 12 (now respectively renumbered 1 – 11)** are allowed. The following is an Examiner's statement of reasons for allowance:

The closest prior art discloses an image processing apparatus that includes a color-difference signal processing circuit that performs detection of color-difference data from the color-difference signals transmitted from a signal processing circuit, and transmits the detected color-difference data to the color correction value setting circuit, where the color correction value setting circuit identifies the particular color to be corrected, on basis of image-taking mode information. The closest prior art additionally discloses an image processing apparatus that includes a weighting coefficient setting device that determines a weighting coefficient indicating a degree of color adjustment within a color adjustment area.

However, the closest prior art does not disclose or fairly suggest where the image processing apparatus further includes a color convergence parameter value containing position data indicative of a position of a predetermined color in a color-difference plane, correction range setting data for setting to a correction range a predetermined range centered at the position of the predetermined color, and convergence coefficient data for converging a particular color corresponding to the correction range to the position indicative of the predetermined color.

2. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
